

The FARM CONSULTANCY Group

The Farm Consultancy Group - Who Are We?

The Farm Consultancy Group is a group of eight independent farm business consultants established 25 years ago. We all run our own businesses, some working on our own, others with employed staff and associates with a total of twenty consultants nationwide. The Sherborne office, **Midwest Consulting Ltd**, has five experienced consultants and three experienced farm secretaries. See www.fcgagric.com

We collaborate on training, indemnity insurance, marketing, software development, office supplies etc. We keep up to date with internal training sessions run by colleagues or external training from the leading experts in specific business areas. We are in virtual daily email contact with each other with a number of queries circulating on various topics, ranging from technical queries to business ideas. This is a great strength to our clients, as it means if somebody has an idea or a problem somebody else within FCG will have experienced it or had a client experience it and may well be able to pass on some relevant help. In this way we feel our clients are also very much part of the FCG ethic.
